SW Engineering CSC648-848 Spring 2025

ThriftAtSFSU

Milestone 3

Team 15

Hilary Lui (hlui@sfsu.edu)	Team Lead
Annison Van	Frontend Lead
Sid Padmanabhuni	Backend Lead & GitHub master
Joseph Alhambra	Team Member Frontend
Joseph Shur	Team Member Backend

Date Submitted	5/20/2025
Date Revised	5/20/2025

Summary of Milestone 3 meeting review with intructor and plans for further development

Team number: 15
Meeting date: 4/22/2025

Summary of feedback on UI

On Server (Overall/General Notes)
- Looks nice on server (thriftatsfsu.com)
    - Slider can sometimes "overslide" / cross over
- "About me" is in non-conspicuous spot
- Non-functional requirements: should have title bar stating this isn't a real website
    - Can't be in footer, *only* at header
- Needs to be clear that this isn't a *real* website, given that we're also using references to the school (and since people do dumb things, our point is to protect ourselves)
- UI is fine
- Looks nice, "very well done"

Home Page/Search
- Images should be more uniform for items on home page/search
- Don't let the images affect the layout of the text
    - Separate divs?
- The POST button should be a **call to action** that is visible, obvious, central to the design and can't be missed
    - Make it a big purple button?
    - Looks less important than the "About Me"
- Move categories to more general section besides Home Page

Registration Page
- Missing all required markers (username, password, etc)

POST Directory/Create New Item Form
- Missing required markers

- Possibly change location of "image" upload? Second or third on form

Listing Page
- Possibly remove the rating on the listing page? Just have it only display on the seller's profile/dashboard
- "Ratings" and "View Profile" are redundant design

Messages Page
- Give some more space
- Use silhouette as a placeholder icon
- Decide between "Active Now" with a dot, or on the side with the bar
    - Maybe do a 30-minute timer
- Planning on a button on profile page

Profile/Dashboard
- Calendars are a concern if they suggest an availability and it isn't accurate/updated
    - Might expect more from the average user
    - Availability takes up too much space
- Need a way to access Messages directly from dashboard
- Change the column on the right to be information (populate with availability)
    - Eliminate negative space?

Summary of feedback on code and architecture
N/A (no notes provided)

Summary of feedback on GitHub usage
- CTO mentioned low GitHub commit count is expected at this point in development, but to keep an eye on it for future milestones and group work

Summary of feedback on DB
N/A (no notes provided)

Summary of feedback on teamwork and risk management

N/A (no notes provided)

Confirmation of architecture review

We have confirmed with our group that we are adhering to the MVC pattern, coding style, and the minimal agreed-upon documentation. We will keep up-to-date with code reviews and ensure we continue to follow these agreed-upon practices.

List below agreed-upon P1 list of features

1. Users of all levels of authority and privileges shall be able to access the app and see listings and reviews of associated listings.
2. Unregistered users shall be given the opportunity to create an account, which will allow them to become registered users and gain access to all associated privileges and benefits.
3. Unregistered users shall be able to search based on text search and filter by category.
4. Registered users shall agree to the terms and conditions upon account creation.
5. Registered users can create listings and reviews for other users.
6. Registered users shall be able to create chat logs with other registered users.
7. Admin shall be able to create listings, regardless of ownership.

Other comments & issues

None at this time.

Check point & due date

Check point is in the form of this document, and the due date is with Milestone 5 on May 20th, 2025.

- ☑ ~~•Summary of feedback on UI (record all pages that need revision)~~
- ☑ ~~Summary of feedback on code and architecture~~
- ☑ ~~Summary of feedback on GitHub usage~~
- ☑ ~~Summary of feedback on DB~~
- ☑ ~~Summary of feedback on teamwork and risk management~~

- ☑ Confirm that you have done an architecture review to ensure developers adhere to the MVC pattern, coding style, minimal agreed-upon documentation, etc. Record if OK or list the issues found. Request that developers follow up on corrections and follow up later by doing code reviews.
- ☑ List below agreed-upon P1 list of features for final delivery, which constitute the product plan. NOTE: after this meeting, the team focuses solely on this P1 list of features, e.g. the development is in "feature freeze mode". All listed P1 features (no more no less) MUST be delivered in a usable way, free of bugs and will be used for grading
- ☑ Any other comments and issues
- ☑ Check Point (CP) if given, DUE:
